

Environmental Consultant Specialising in Flood Protection Solutions

This market leading flood resilience solutions provider based in the South East of England offers a unique opportunity.

Highlights include:

- ✔ Specific IP on a variety of flood defence products and strong public sector relationships
- ✔ Significant confirmed order book and pipeline, selling both national and internationally
- ✔ 3 year forecast of £15m with opportunities to improve and capitalise further
- ✔ Long established and strong working relationships with local authorities, housing associations, major utility companies, insurance and financial institutions and multi-national corporations
- ✔ Industry leading In-house testing facility

A rare opportunity to acquire an industry leading Environmental Consultancy Business with over 50 years' combined experience and expertise in the flood management industry. This business provides flood resistance (dry-proofing) and resilience (wet-proofing) solutions for communities, homes, businesses and infrastructure.

With a healthy order book and burgeoning potential pipeline, the business's management believe it is right to focus their business for the next steps. The current majority shareholders have a desire to stay and help drive the projected growth. The company is looking for a partner that is well connected, has industry knowledge and help win and deliver larger projects. The opportunity is to acquire a significant stake of the company with the ideal investor bringing a mixture of financial and strategic support.

With a real lack of capacity in the flood management industry in general, this represents a fantastic opportunity for anyone within the flood management industry or those in related sectors looking to diversify their offering.
